# NCAAA ACCREDITATION

**MACHS receives 4-year conditional institutional accreditation from NCAAA**

## THE FIRST PRIVATE COLLEGE GRANTED INSTITUTIONAL ACCREDITATION IN EASTERN PROVINCE

Mohammed Al-Mana College for Medical Sciences has been granted four-year institutional accreditation from the Education and Training Evaluation Commission/National Commission on Academic Accreditation and Assessment (NCAAA). The accreditation ensures that the institution upholds the NCAAA standards and has achieved remarkable level of best practices within the quality standards of the commission.

This milestone recognizes MACHS' effort to provide robust platform and excellent offerings focused on quality instruction, training, community service and research. "This is added to what we have accomplished so far and hopefully a springboard to more achievements in the future" said Prof. Emad Alshwaimi, the College Dean in his congratulatory note. He thanked the management led by Dr. Aisha Al-Mana, the college's General Supervisor for the untiring support to achieve this undertaking as well as the faculty, staff and students. "Many thanks to the Quality Affairs and Accreditation Unit for their dedication and hard work and to each department head and members for their work and cooperation", he further noted.

This conditional accreditation is a culmination of the College's several years of diligence from the proposal, workshops, preparation and submission of eligibility requirements in 2019 to interviews and verification of documents by the external review board this past February. This marks a celebration of collaborative efforts and an affirmation that MACHS aims towards continuous improvement.

As of writing, MACHS is the 1st Private College for Medical Sciences accredited institutionally by the NCAAA in the Eastern province.

### MACHS, NCAAA Meet to Discuss Academic Program Accreditation

Administrators of Mohammed Al-Mana College for Medical Sciences led by its General Supervisor, Dr. Aisha Al-Mana met some officials from National Commission on Academic Accreditation and Assessment (NCAAA) on April 5 at the Board of Trustees Conference Hall . The meeting took place in preparation to the College's goal of applying academic program accreditation with the NCAAA. This is part of the college's continuous pursuit of excellence of providing high quality in education standards.

## Student Affairs Holds ED Overcrowding Control Workshop

Student Affairs spearheaded a webinar dubbed as "How to Solve Emergency Department Overcrowding" last April 8. Dr. Ahmed Al Sulaiman, a visiting doctor gave his insights on how to face and deal with overcrowding in Emergency rooms. Among his interesting topics revolved on ambulance diversion, increasing human capacity with human and physical resources, re-opening in-patient beds, post-poning elective surgery and improving discharge processes.

#### How to solve ED overcrowding

- 1-Ambulance diversion:  
Generally, it means hospitals only take ambulance deliveries from within their own designated geographic areas, with a few exceptions.
- 2-Increasing ED capacity, with both human and physical resources
- 3-Re-opening inpatient beds
- 4-Post-poning elective surgery
- 5-Improving discharge processes

### Continuous Final Season Covid-19 Precautionary Measures in the Campus

To prevent Covid-19 spread during final season, precautionary measures are still active in the campus. The management even beefed up its activities to maintain a safe learning environment. Among the initiatives currently in place are sanitation activities in corridors, classrooms and other facilities; Tawakkalna and body temperature status check upon entry in the building; providing sanitizers and alcohol in strategic places; social distancing at all times; and Covid-19 exam protocols. These measures are in place to protect each and every member in our community.

## IPR Workshop Report:

The Scientific Research Unit (SRU) in collaboration with Professional Development Committee (PDC) has organized a virtual seminar on Intellectual Property Rights Filing and Procedure, April 25 via Zoom application.

**Dr. Ayaz Ahmad**, Chair of the Scientific Research Committee served as the event's resource speaker. The information provided was successfully presented with an ultimate goal of clarifying the intellectual rights of MACHS researcher and third-party sponsors of research. Filing procedure was also highlighted to guide faculty researchers as they embark applying IP rights in the future.

After delivering his presentation, the participants posed a variety of questions, mostly clarifications on the workshop's theme.

The workshop was highly informative to the attendees. Forty-two faculty members from different departments were present at the event whom were encouraged by the speaker to become IP aspirants in their chosen field of studies.
